

SERVICE ONE ACCESS, INC.

Equipment Rental & Access Innovations for
Construction & Maintenance

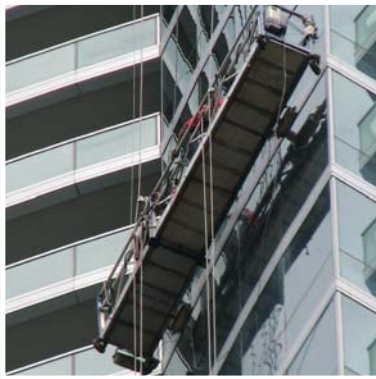

Since 1984, clients have relied on our rigging expertise and unique equipment inventory to provide customized and efficient access solutions. Service One Access is dedicated to safety, code compliance, competitive pricing, and the long term interests of our clients.

Service One Access provides equipment rental & access innovations for construction, industrial access, and facade maintenance. Our large rental fleet of specialty boom lifts include Denka Lifts, ReachMaster lifts, and track mounted atrium lifts. These versatile, lightweight lifts allow access to building facades and atriums from 50 to 105 feet high, yet will fit through a 32 inch door!

Suspended Access – Powered Platforms and Work Cages

- Powered modular swing stages for commercial or industrial applications
- Outrigger base support frames and outrigger systems
- Bridge access, cantilevered decks and support systems
- Material hoists and hoisting services
- Three-point suspension platforms with light, medium, or heavy duty load ratings

From securing the required city permits to dispatching experienced emergency response teams for same day service, call us for all your scaffold needs.

Frame Supported Tower Scaffold

- System Scaffolding
- Frame and Brace
- Rolling Towers

Our experienced and versatile crews have erected narrow towers to access areas above escalators and machinery, in narrow residential gangways, and to span large swimming pools with rolling dance floors.

Specializing in both aluminum and steel, we have the right scaffolding equipment for your application.

Sidewalk Canopies and Overhead Protection

- Light duty rolling canopies for maintenance
- Heavy duty sidewalk canopies for construction
- Permit services and certified scaffold erectors

As an approved City of Chicago erector of sidewalk canopy scaffolds, we provide a variety of overhead protection solutions for both interior and exterior applications.

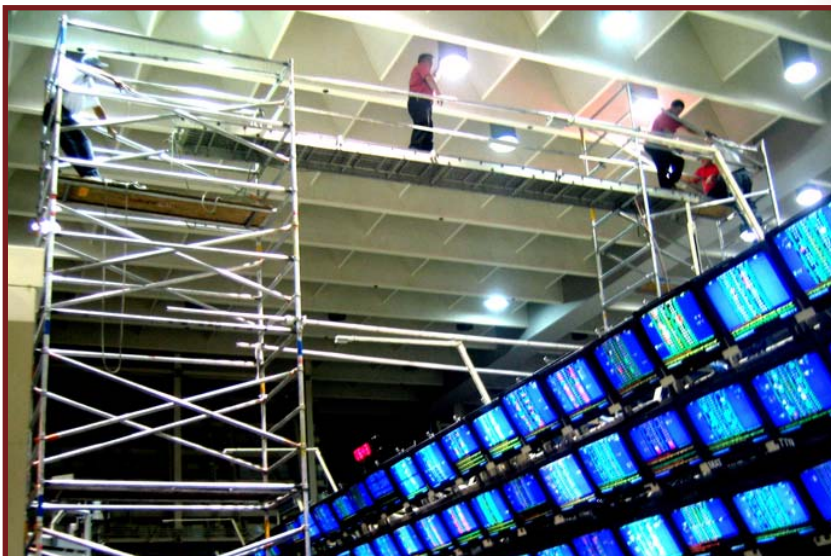

Aluminum Tower Scaffold

Service One Access is a global provider and factory authorized distributor of Instant UpRight and Spandeck scaffold systems. We stock an amazing inventory of standard and custom UpRight Aluminum Scaffolding and Spandeck components.

Instant UpRight Aluminum Scaffold is the world's leading span scaffold with unlimited versatility, providing a wide range of unique access capabilities and solutions. Lightweight and easy to assemble, UpRight Aluminum Scaffold meets or exceeds OSHA 1910.29 and ANSI A10.801988.

Service One Access can provide basic aluminum tower scaffolds for rental or purchase, or our expert erectors can install custom scaffolding to meet your project needs.

- Stairwell and escalator towers
- Truss frames, walk-through frames, and high-clearance platforms allow lightweight towers to be customized and assembled quickly and efficiently
- Spandeck for temporary or permanent catwalk systems
- Leading or trailing edge fall protection systems
- Pool bridges and innovative spanning capabilities
- Rolling Towers

Consulting and Design of Permanent Building Access Systems

As a consultant to some of the world's tallest buildings and atriums, we have the practical experience and technical expertise to oversee the design specifications for permanent suspended access systems from conception to fabrication and installation.

By working with architects, developers, facility managers, and building owners to design practical, safe, and user friendly systems we can reduce our client's operating costs and liability exposure. We provide:

- Roof anchors for suspended access
- Davit and socket systems
- Monorails
- Fall arrest and fall protection
- Load testing and certification of suspended systems in accordance with OSHA and ANSI standards
